

# SURE GRIP CONTROLS™

## Endurance Series

### Joystick

The Endurance Series sets the standard for multi-axis, ergonomic joysticks. Developed with an ergonomic-first approach, the Endurance Series joystick is specifically engineered for optimal performance and durability in demanding, high-use vehicle applications.

Its design reduces user fatigue and repetitive strain injuries, while capacitive sensing ensures an additional level of safety — whether you're wearing gloves or not. Customizable features make the Endurance fully adaptable for any application.

### Highlights

#### Maximum Operator Comfort and Efficiency

- Advanced ergonomic design that matches bio-mechanical motion.
- High lumen, dimmable, titanium oxide LED buttons
- Available in left and right versions.

#### Fully Customizable, Modular Design

- Fully customizable lighting and faceplate
- Interchangeable, modular components

#### Rugged, Long-Lasting Performance

- Rated -40° to 85°C (185°F) operation
- Tested to withstand 5 million cycles (20 million operations)

### Applications

Construction

Forestry

Agriculture

Mining

Material Handling
